MEG usage during COVID-19 Pandemic

QA/Phantom measurements and paradigm backup by MEG Support.

- MEG Support to wash hands and use Anti-Bac hand dispenser before entering Lab.
- At MEG Support’s discretion to wear face covering when running QA/Phantom measurement.
- All non-essential items - coats, bags - to be left at home or left in Offices (if open for access), to reduce possible infection/contamination of surfaces and increasing cleaning time.

1) MEG Support to only use equipment, or enter rooms, relevant to the procedure.
2) MEG Support to use designated Operator chair.
3) MEG Support to clean all areas/equipment used after QA completed, following Cleaning Protocol.
4) Upon leaving (and locking if required) Lab, MEG Support to clean hands with Ant-Bac from hand dispenser and wash hands once out of MEG corridor.

Single Operator, or dual usage (with Shadower) when testing stimuli/triggering, OPM usage.

- Operator/Shadower to wash hands and use Anti-Bac hand dispenser before entering Lab.
- At Operator’s discretion to wear face covering if working alone when testing stimuli/triggering, OPM usage.
- Operator/Shadower to both wear face covering when testing stimuli/triggering, OPM usage together as unable to adequately 2m SD in Lab.
- All non-essential items - coats, bags - to be left at home or left in Offices (if open for access), to reduce possible infection/contamination of surfaces and increasing cleaning time.

1) Operator/Shadower to only use equipment, or enter rooms, relevant to their testing.
2) MEG Support to clean, power up, check relevant equipment, clean equipment, then leave before arrival of Operator/Shadower.
3) Operator/Shadower to keep to designated chairs.
4) Operator/Shadower to clean all areas/equipment they have touched when finished, following Cleaning Protocol.
5) Operator/Shadower to follow relevant procedure if contact with MEG Support required to deal with any technical issues.
6) Upon leaving (and locking if required) Lab, Operator/Shadower to clean hands with Anti-Bac from hand dispenser and wash hands once out of MEG corridor.
